DETAILED ACTION

Allowable Subject Matter

1. Claims 1-36 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:

Claims 1, 10, 19, and 28 recite, inter alia, a "frame classifier to determine if said network traffic should be provided directly to said embedded processor without passing through said switch or directly to said switch". Prior art of record do not teach or suggest, either alone or in combination, the aforementioned limitation, nor would it be obvious to modify those references to include such limitation. Examiner notes that prior art of record, as applicant argued, teaches that network traffic is passed through the switch from the port processors to other processors regardless of the type of processing needed. In contrast, applicant's invention utilizes port processors with embedded processors that allow some network processing to occur within the port processor. Network traffic that only requiring processing provided by the port processor can be directly processed by the embedded processor without passing through the switch for further processing by other modules.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Scott Sun whose telephone number is (571) 272-2675. The examiner can normally be reached on M-F, 10:30am-7pm.
